

NAVEFIL®

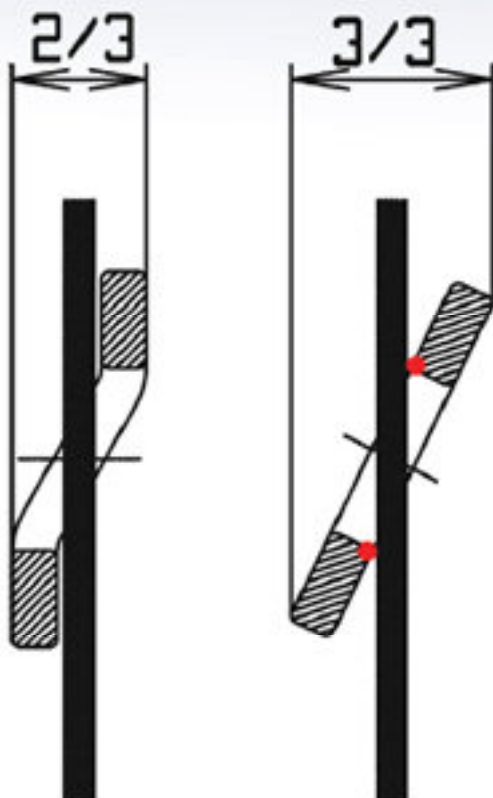

NAVETA'S latest innovation - NAVEFIL
A new shape of thread eye.

Thanks to our long experience in the textile industry, our technical team have developed and successfully patented a new shape of thread eye NAVEFIL®

This new eye has already been successfully tested and used by many of our VIP customers and become their first choice.

NAVEFIL®

STANDARD

WHY CHOOSE NAVEFIL®

- Reduced warp friction, thus reducing the possibility of ripping.
- Elimination of two critical points by the contact of the thread with the healds (red points in the diagram).
- Possibility of raising density by up to 30%.
- Possibility of increasing the speed of the machine, giving greater productivity.
- Full compatibility of NAVEFIL® healds with competitor's products of the same type by a change over on to NAVETA products.
- Full compatibility and problemless guidance on automatic looming appliances (such as Delta, Vega and others).
